APPLICATION FORM

## Australian Organic Registered Inputs and BFA Approved Products

Australian Organic registration is designed for products used in organic farming or processing. It gives confidence to certified organic businesses that the input or product complies with the Australian Certified Organic Standard and won't compromise an operator's certification. Examples include natural fertilisers, bio-pesticides, animal health products, cleaners, sanitisers, water, salt and mineral based products. For further information please contact Australian Organic Ltd or visit the Australian Organic website [www.austorganic.com](http://www.austorganic.com)
